

## LGBTQ+ Implicit Bias Checklist

---

- Accept that we all have implicit biases
- Explore where you may be particularly vulnerable
- What demographics do you have less interaction and exposure to? (Return to the Intersectionality and Social Location slides and worksheets if you need ideas about where/how to explore)
- Are there demographics that you are already aware you may have negative bias about?
- Was there messaging about LGBTQ+ population in your family of origin or local community growing up?
- Where do you get your information about the LGBTQ+ community? (Stereotypes, news, entertainment media, family, friends, books, organizations, church, etc.)\*
  - Who do you get it from?
  - Why were you looking for the information?
  - When was the content created?
  - Who created the content?
  - Who was the content created for?
- Has a member of the LGBTQ+ community ever identified any bias in you directly?  
How did you respond?
